

Prasidha Timsina
CS121
Final Project Status Update 1
3/2/18

Summary of work so far: Researched and ordered parts needed for our project and discussed the different things needed to be done for it. Started designing a database for our website.

Time Log:

Worked on:	Time	Person
Researching parts	1hr	Luke and Prasidha
Designed DB	30 min	Prasidha

Next steps are to test out the parts we ordered and actually make the DB and then start setting up the website.

Challenge: We ordered one part that ended up not working with our project, we had to re-research what we needed.
